1 Overview

1.1 Introduction

NSW Fair Trading regulates the sale of electrical articles in New South Wales. It has dual roles in relation to electrical articles, being:

- (a) an approval body that can certify that an electrical article is compliant to sell and
- (b) ensuring that only compliant electrical articles are sold or available for sale in the market place

This document provides information about the sale of electrical articles in New South Wales, outlines the responsibilities of those selling electrical articles in New South Wales and provides instructions on the process to obtain approval for the sale of electrical articles.

1.2 Legislation

The predominant laws applying to the sale of electrical articles in New South Wales are the Electricity (Consumer Safety) Act 2004 ([Electricity \(Consumer Safety\) Act 2004](#)) and the Electricity (Consumer Safety) Regulation 2006 ([Electricity \(Consumer Safety\) Regulation 2006](#)). All Fair Trading legislation can be found at www.legislation.nsw.gov.au.

Sellers of electrical articles to consumers are also subject to the Australian Consumer Law (ACL) ([Australian Consumer Law](#)). The ACL is contained in Schedule 2 of the *Competition and Consumer Act 2010* and came into effect on 1 January 2011 nationally and as a law of each State and Territory. The ACL provides a single national consumer law, which is jointly enforced by the Australian Competition and Consumer Commission (ACCC) and state and territory consumer protection agencies. Electrical articles are covered by the ACL consumer guarantees as long as they are sold in trade or commerce and bought by a consumer, as defined under the Act. Under the ACL, there are nine guarantees that apply to goods. These include that suppliers and manufacturers guarantee goods are reasonably fit for any purpose specified and are of acceptable quality when sold to a consumer, including that the goods are safe and free from defects .

1.3 Declared and non-declared electrical articles

In New South Wales electrical articles are divided into two groups – declared and non-declared, according to consumer safety risks. There are different requirements for the sale of declared and non-declared articles.

1.3.1 What is a declared article?

There are 58 classes of electrical articles classified as declared articles. Declared articles are those that are typically found in residential homes or are articles which are used frequently by consumers. Examples include dishwashers, hairdryers, room heaters and sewing machines. The list of declared articles is regularly reviewed to take into account emerging new technology. In accordance with the Electricity (Consumer Safety) Act, declared electrical articles are published in the NSW Gazette. A full list of declared articles, together with their definitions and associated Australian safety standards are [attached](#).

1.3.2 What is a non-declared article?

A non-declared article is any electrical article that is not listed as a declared article.

2 Sale of electrical articles in New South Wales

2.1 Definition of 'Sell'

"Sell" includes auction or exchange; offer, agree or attempt to sell; advertise, expose, send, forward or deliver for sale; cause or permit to be sold or offered for sale; hire or cause to be hired; and display for sale or hire.

The laws apply to any person who sells an electrical article and includes the manufacturer or importer and any on-seller.

2.2 Declared Articles

In order to sell declared articles in New South Wales, the articles must:

1. Be approved and certified as compliant to use prior to sale, evidenced by a NSW Fair Trading **Certificate of Approval** (or by an accredited [Recognised External Approval Scheme](#)).
2. The certification process must demonstrate that the electrical article meets all relevant standards and any further requirements that may apply. This process includes the testing of these articles in accredited laboratories.
3. Be marked with the NSW approval mark or an approved alternate mark.
4. Definitions of declared articles and their associated safety standard/s are [attached](#).

2.3 Non-declared articles

In order to sell non-declared electrical articles in New South Wales, the articles must comply with the minimum requirements specified by Australian Standard 3820:2009 - *Essential safety requirements for low voltage electrical equipment*. This Standard ensures that any non-declared electrical article must be compliant and not cause injury, electrical shock, or fire. Copies of Australian Standard 3820:2009 can be purchased from [SAI Global](#).

Certification may be sought for non-declared electrical articles by a seller, manufacturer or importer. Certification in this instance will ensure that the article is compliant for use. When a request for certification of a non-declared article is approved by NSW Fair Trading, a

Certificate of Suitability can be issued. However, a Certificate of Suitability is not mandatory in order to sell a non-declared electrical article in New South Wales.

2.4 Who can issue Certificate of Approval or Certificate of Suitability?

NSW Fair Trading is a body which can certify and approve that an electrical article is compliant, prior to sale. In order to obtain a Certificate of Approval for declared articles or a Certificate of Suitability for non-declared articles, an application must be completed - [Form EEA1](#).

NSW Fair Trading has also recognised external certification bodies known as Recognised External Approval Schemes or REAS, to approve declared electrical articles. Attached is a list of the NSW accredited [REAS and their contact details](#).

Under mutual recognition laws, NSW Fair Trading will also recognise approvals issued from other jurisdictions within Australia and New Zealand.

3 Applications to NSW Fair Trading

3.1 Lodgement details

Applications are to be emailed to:

energyapprovals@finance.nsw.gov.au

or posted to:

Electrical & Gas Unit
NSW Fair Trading
PO Box 972
Parramatta NSW 2124

3.2 Processing Times

The time taken to process applications can be up to 20 working days (four weeks), where the application has all required information.

3.3 Duration of Approvals

An approval for a declared article is usually granted for a five year period and may be renewed. The model must, throughout its life, continue to comply with the currently gazetted Australian Standard/s and any changes to the Standard/s, along with any other conditions applied in the granting of the original approval.

3.4 Markings

Approved articles must be marked with the approval number or with an approved alternate mark. A Certificate of Approval marking will be in the format “NSWxxxxx” for a declared article or “CSxxxxxN” for a Certificate of Suitability for a non-declared article. NSW Fair Trading will specify the sequential “xxxxx” number.

3.5 Fees

Applications will not be processed until the full fee has been paid. The [schedule of fees](#) is attached to the end of this document.

Fees can be paid by Electronic Funds Transfer (EFT) or cheques made payable to NSW Fair Trading. Payments by EFT must be made to the account details as follows:

Bank Name: Westpac

Bank Address: Level 1, 275 Kent Street, Sydney 2000

Account Name: OFT Electrical Remitting Account

BSB Number: 032-001

Account Number: 168071

Swift Code: WPACAU2S

Please use the existing certificate number or name of your company/business as a reference when making payment and forward a copy of the remittance advice along with your application.

NSW Fair Trading will soon be implementing an online payment portal which will allow for credit card payments. These notes will be updated with further details when this function becomes available.

4 Types of Applications and Requirements

4.1 Applications for Certificates of Approval (declared) or Certificates of Suitability (non-declared)

All applications must include the following:

1. Completed and signed [Form EEA1](#)
2. Test Report/s demonstrating that the article complies with the relevant Australian Standard/s from an accredited 3rd party laboratory (see 4.1.1).
3. Comprehensive colour photographs of the interior and exterior of the article
4. Samples of the electrical article if requested (samples will be returned at the completion)
5. Application fee
6. Any other information requested by NSW Fair Trading

4.1.1 Evidence of Compliance/Test Reports

The compliance of any electrical article must be demonstrated and accompanied with a full test report from an accredited 3rd party laboratory.

The majority of the Australian Standards applied to electrical articles are based on International (IEC) and European (EN) Standards. Test reports to these standards may be accepted provided any Australian variations are suitably addressed. NSW Fair Trading will subject to NSW Fair Trading discretion accept, but is not limited to, test reports issued by the following accredited laboratories:

1. Accredited by the National Association of Testing Authorities, Australia (NATA) – www.nata.asn.au
2. Under the Certifying Body (CB) scheme
3. By organisations with partnership arrangement with NATA
4. Recognised or certified within their own country by an appropriate national body or internationally by similar bodies

4.1.2 Compliance

It is the responsibility of the seller of a product to ensure that the product complies with the gazetted Standard at all times.

Most issues relating to non-compliance are not as a result of a design deficiency but one of quality assurance where the approved product although identical in appearance may over time, for a number of reasons, eg undisclosed outsourcing, be of a lower quality and no longer compliant.

When sourcing product it is important to ensure that the manufacturer has an appropriate quality assurance scheme in place.

The Australian approval schemes are System 1(a) Certification Schemes as detailed in AS/NZS ISO/IEC 17067 and are referred to as Type Test Certification. This requires that for approval limited representative samples of an article be sent to a recognised Testing Laboratory and assessed and evaluated against the gazetted Standard.

There are however a number of certification levels available, that in addition to a Type Test incorporate different levels of factory / production / market surveillance to ensure continued compliance of the product. These schemes are essentially based on, or are equivalent to AS/NZS ISO/IEC 17067 Systems 2 to 5, where the higher the number the greater the surveillance.

A higher level of quality assurance may be critical for high risk articles associated with the fixed wiring in buildings, recall of which may be extremely costly if not impossible.

A number of Certification Bodies offer this service and although not mandatory for approval will provide a higher level of confidence in the integrity of the product and lessen the chance of a product recall.

New South Wales Fair Trading is currently evaluating the application of an elevated level of quality assurance in conjunction with a Type Test to provide an enhanced level of safety for particular high risk articles.

4.2 Applications for Modification

An application for modification of an approval must be submitted when the design, materials or construction of a model article is changed.

A General Exemption has been issued to cover articles that differ in very minor variations such as substitution of equivalent components (like for like) or changes in the styling or trim, from the original model approval. Approval for modifications in this instance is not required. A copy of the exemption is [attached](#).

Applications for modification must contain the following:

1. Completed and signed [Form EEA1](#)
2. Test Report/s demonstrating that the article complies with the relevant Australian Standard/s (if required) (see 4.1.1)
3. Comprehensive colour photographs of the interior and exterior of the article
4. Samples of the electrical article if requested (samples will be returned at the completion)
5. Application fee
6. Any other information requested by NSW Fair Trading

4.3 Applications for Renewal

An application **must** be submitted no later than one month before the approval certificate is due to expire.

NSW Fair Trading will send a renewal reminder notice three months prior to the expiry date of the certificate. The holder of the certificate of approval is responsible for ensuring that the certificate remains current for as long as the article is still being sold.

Applications for renewal must contain the following:

1. Completed and signed [Form EEA2](#)
2. Application fee

The following may also be required by Fair Trading:

1. Test Report/s demonstrating that the article complies with the relevant Australian Standard/s and any changes to those Standards that occurred since the original approval (see 4.1.1)
2. Comprehensive colour photographs of the interior and exterior of the article
3. Samples of the electrical article if requested (samples will be returned at the completion)
4. Any other information requested by NSW Fair Trading

4.4 Notifications of Changes of Particulars

Written notice must be given to NSW Fair Trading within 21 days of any change in the:

1. Name of the approval holder
2. Change in the model reference code or
3. Description of the article (including trade name marking)

Applications for changes in particulars must contain the following:

1. Completed and signed [Form EEA3](#)
2. Application fee

4.5 Applications for Extension of Approval

Extensions for approvals may be granted under exceptional circumstances upon request by the certificate holder. An extension may be granted for a period of up to twelve months from the expiry date of the approval. Requests for extension must include the following:

- A declaration from the certificate holder that they are not aware of any safety incidents involving the approved article
- The approximate number of articles remaining in stock
- The amount of time required to clear remaining stock
- Application fee

5 Other regulatory requirements

5.1 Additional compliance requirements

In addition to electrical safety requirements administered by NSW Fair Trading, electrical articles sold in New South Wales may also need to comply with:

1. Gas appliance certification. This is also administered by NSW Fair Trading through recognised Certified Approval Bodies. For further information refer to www.fairtrading.nsw.gov.au.
2. Electro-Magnetic Compatibility (EMC) requirements administered by the Australia Communications and Media Authority. The Authority can be contacted on 1300 850 115 or via www.acma.gov.au.
3. Energy efficiency and labelling requirements (also known as MEPS). These are administered by the Commonwealth Government. Further information can be obtained at www.energyrating.gov.au.
4. Watermark certification requirements. These are administered by the Australian Building Code Board. Further information can be obtained at <http://www.abcb.gov.au/Product-Certification/WaterMark-Certification-Scheme>

5.2 NSW approvals and the Electrical Equipment Safety Scheme (EESS)

NSW Fair Trading is recognised as the leader in certification and compliance in Australia. NSW Fair Trading and NSW accredited REAS issue around 80% of approvals Australia wide.

Approvals in NSW continue to be issued under the existing scheme. NSW Fair Trading continues to comply with the Mutual Recognition Act and will recognise Certificates of Conformity issued by other States, as well as the use of the RCM mark.

There is no national electrical Equipment Safety Scheme (EESS) at present. Queensland has implemented a new scheme (established under Queensland legislation) but there has

been no formal agreement made by State and Territory Governments about the establishment of the EESS. Accordingly, each individual jurisdictions' existing arrangements continue to apply.

NSW Fair Trading is committed to ensuring that whatever scheme or schemes apply in the future, it will work as closely and as seamlessly as possible with the other Australian and New Zealand regulators. This includes applying Mutual Recognition laws and arrangements as fully as possible, and we expect that those arrangements will be reciprocated. In addition, NSW Fair Trading representatives contribute to many Australian Standard and technical committees including the Electrical Regulatory Authorities Council (ERAC).

A statement has been issued by NSW Fair Trading to clarify these matters. See [Fact Sheet](#) (at the end of this document).

ELECTRICITY (CONSUMER SAFETY) ACT 2004

Order under Section 16(2)

WHERE a modification has been made to an electrical article for which a model approval under section 11 of the Electricity (Consumer Safety) Act 2004 is in force and the modification has been made only by way of:

- substitution of equivalent components; or
- change to the styling or decorative trim,

then a person who sells such an electrical article is, by this order, exempt from the operation 16(1)(a)(i) of that Act.

This Order takes effect from 25 September 2006.

ROD STOWE, Acting Commissioner for Fair Trading

CATEGORIES AND FEES FOR DECLARED AND NON-DECLARED ARTICLES (Effective 1 July 2017)	
Category 1 articles means any electrical articles of the following kind	Category 2 articles means any articles that are not Category 1 articles
Appliance Connector	
Bayonet Lampholder	All other electrical appliances (<i>electrical appliance</i> means a device in which electrical energy is consumed or substantially changed in character by conversion into heat, sound, motion, light or otherwise)
Bayonet Lampholder Adaptor	
Control or Conditioning Device	
Cord Extension Socket	
Cord-Line Switch	
Decorative Lighting Outfit	
Edison Screw Lampholder	
Fluorescent Lamp Ballast	
Fluorescent Lamp Starter	
Inspection Handlamp	
Luminaire (whether or not portable)	
Outlet Devices	
Plugs	
Socket-Outlet	
Supply Flexible Cord	
Wall Switch	
Any other apparatus, fixtures, devices, materials or the like (other than electrical appliances that are used, or are intended for use, as part of, or connection with, electrical installations)	

Application	Fee
1. Application for model approval (clause 5(2)(a))	
(a) for Category 1 articles	\$476
(b) for Category 2 articles	\$949
2. Application for renewal of model approval (clause 8(3)c))	\$476
3. Application for extension of a model approval	\$476
4. Application for modification of model approval (clause 11(2)(b))	\$357
5. Lodgement of notice of change of particulars of model approval (clause 13(2)):	
(a) for change of no more than 4 model approvals by means of a single notice	\$117
(b) for change to each additional model approval specified by the notice	\$34 per additional approval

FACT SHEET – NSW ELECTRICAL APPROVALS AND THE EESS

Industry Colleagues

I am emailing regarding the consumer electrical safety regime in NSW, the Queensland Electrical Safety regime, and the proposed Electrical Equipment Safety System (EESS).

My purpose in writing as the NSW consumer electrical safety regulator is to correct any misunderstanding or misinformation regarding the current requirements and NSW's participation in the proposed EESS scheme.

The *Electrical (Consumer Safety) Act 2004* and its Regulation remain the legislative framework for consumer electrical safety and equipment in NSW.

However, NSW is considering the proposal that all State and Territory regulators participate in the proposed EESS. It is not correct to say that NSW will not participate in the EESS. No formal decision either way has been made at present.

It is important to note that unless and until other Australian states and territories legislate to formally adopt the proposed EESS scheme each individual jurisdictions' existing arrangements continue to apply.

NSW Fair Trading is and will continue to approve Recognised External Approval Schemes (REAS), and to undertake electrical approvals.

I can assure you that we are committed to ensuring that whatever scheme or schemes apply in the future, NSW will work as closely and as seamlessly as possible with the other Australian and New Zealand regulators. This includes applying Mutual Recognition laws and arrangements as fully as possible, and we expect that those arrangements will be reciprocated.

On a related issue which has been raised with us by some stakeholders, it is important to recognise the distinction between ERAC and the EESS. ERAC is an important part of the co-ordination of electrical regulatory issues between states and territories. However ERAC is not a formally constituted or incorporated body. As such ERAC has no authority of its own except through the actions of the individual regulators (and governments) involved. ERAC cannot make decisions that commit governments to any particular action.

If you wish to discuss these issues with NSW directly please contact me or my colleague Lynelle Collins at EnergyApprovals@finance.nsw.gov.au.

If you have queries about the current position and plans in Queensland for transition to the proposed EESS please contact the Electrical Safety Office, Queensland.

John Tansey

Assistant Commissioner
NSW Fair Trading

December 2013

Electricity (Consumer Safety) Act 2004

Order under Section 5

I, John Tansey, Executive Director, Building & Construction Service, New South Wales Fair Trading, Department of Finance, Services and Innovation:

- (1) revoke, on and from the date on which this Order is published in the *New South Wales Government Gazette*, the Order dated 16 November 2016 published in the *New South Wales Government Gazette* of 18 November 2016 No. 95 at page 3179; and
- (2) pursuant to sections 5(2) and 5(3) of the *Electricity (Consumer Safety) Act 2004* by this Order, declare the electrical articles of a class described in Schedule 1 to be, on and from the date on which this Order is published in the *New South Wales Government Gazette*, declared electrical articles for the purposes of Part 2 of the *Electricity (Consumer Safety) Act 2004* and the specifications, including modifications, specified in Schedule 1 to be those applicable to electrical articles of that class.

Signed this 7th day of March 2017

JOHN TANSEY
EXECUTIVE DIRECTOR, BUILDING & CONSTRUCTION SERVICE
NSW FAIR TRADING
DEPARTMENT OF FINANCE, SERVICES AND INNOVATION

Schedule 1

Declared Electrical Articles

Interpretation:

In this schedule a reference to-

AS/NZS 60335.1 means AS/NZS 60335.1:2011+A1-3;
AS/NZS 3100 means AS/NZS 3100:2009+A1-4;
AS/NZS 60745.1 means AS/NZS 60745.1:2009 or AS/NZS 60745.1:2003+A1-3. The 2009 edition will supersede AS/NZS 60745.1:2003 and its amendments after all of the Parts 2 of that standard have been superseded;
AS/NZS 60598.1 means AS/NZS 60598.1:2013;
AS/NZS 61347.1 means AS/NZS 61347.1: 2016;
AS/NZS 61535.1 means AS/NZS 61535.1:2011;
AS/NZS 61558.1 means AS/NZS 61558.1:2008+A1-2;
AS/NZS 62841.1 means AS/NZS 62841.1 : 2015.

1. APPLIANCE CONNECTOR - an electrical device which -

- (a) is for attachment to a flexible cord; and
- (b) makes a detachable connection between the conductors of the cord and the pins or contacts of any low voltage appliance or equipment of a type intended or generally used for household applications;

but does not include -

- (c) a connector within the scope of AS/NZS 3123; or
- (d) a plug or socket-outlet within the scope of AS/NZS 3131; or
- (e) an installation coupler within the scope of AS/NZS 61535.1.

Class specification:

Appliance connector –
AS/NZS 60320.1:2012.

Plug connector
AS/NZS 60320.1:2012 and AS/NZS 60320.2.2:2004.

Sewing machine connector -
AS/NZS 60320.2.1:2004.

2. ARC WELDING MACHINE - an electrical appliance which –

- (a) is for use in the electric arc welding process;
- (b) is for connection to single phase low voltage supply;
- (c) is fitted with a flexible cord and plug rated at not more than 16 A;
- (d) can easily be moved from one place to another while it is connected to supply; and
- (e) has, for GMAW (gas metal arc welding), GTAW (gas tungsten arc welding), and FCAW (flux cored arc welding) machines, a 100% output rating not exceeding 65 A.

The 100% rating is calculated from the square root of the marked duty cycle expressed in decimal form multiplied by the marked output current associated with the duty cycle in amperes;

but does not include –

- (f) an arc welding machine promoted exclusively to industry.

Class specification:

IEC 60974.6:2015 or AS60974.6:2006.

3. BAYONET LAMPHOLDER - an electrical device which –

- (a) accommodates a lamp with a bayonet cap of 15 mm or 22 mm nominal diameter; but does not include -
- (b) a lampholder which by design is restricted to specific appliances; or
- (c) a lampholder which is for incorporation in industrial equipment only.

Class specification:

AS/NZS 3100 and AS/NZS 3117:2007 (until 30 December 2016); or
AS/NZS 3100 and AS/NZS3117:2015+A1; or
AS/NZS 61184:2015.

4. BAYONET LAMPHOLDER ADAPTOR - an electrical device which –

- (a) is for insertion into a B22 bayonet lampholder; and
- (b) is for connection to a flexible cord; or
- (c) has one or more lampholders.

Class specification:

AS/NZS 3100 and AS 3119:2015.

5. BLANKET - an electrical appliance which –

- (a) is for the application of heat to a bed or human body;
- (b) is flexible;
- (c) has a fabric enclosure; and
- (d) has a projected surface area exceeding 0.6 square metres;

and includes -

- (e) any associated power supply or controller.

But does not include –

- (f) appliances specifically intended for use under direct medical supervision.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.17:2012 + A1.

6. BREAD TOASTER - an electrical appliance which –

- (a) is a household type; and
- (b) is for toasting bread or similar foods.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.9: 2009+A1 (until 28 November 2017) or AS/NZS 60335.2.9:2014+A1.

7. BUILDING WIRING CABLE

This definition becomes mandatory on 29 January 2018.

A single or multicore electric cable insulated with polymeric materials; that:-

- (a) Has one to five conductors of stranded or solid cores of copper conductors.
- (b) Has an insulated and laid up flat or circular configuration.
- (c) Is sheathed or unsheathed.
- (d) Has a nominal cross-sectional area of 0.5 mm² to 16mm².
- (e) Is intended for use in electrical installations at working voltages up to:-
 - (i) 450/750V; or
 - (ii) 0.6/1 (1.2) kV

But does not include –

- (f) armoured, metallic screened and metal sheathed cables.

Class Specification:-

For working voltages up to 450/750V - AS/NZS 5000.2 : 2006; or
For working voltages up to 0.6/1 (1.2)kV – AS/NZS 5000.1 : 2005.

8. CLOTHES DRYER - an electrical appliance which -

- (a) is a household type; and
- (b) is for drying textile material.

but does not include –

- (c) a heated towel rail.

Class specification:

Rotary type –
AS/NZS 60335.1 and AS/NZS 60335.2.11:2009+A1-4.

Cabinet type-
AS/NZS 60335.1 and AS/NZS 60335.2.43:2005+A1-2.

High Speed Spin Extractor-
AS/NZS 60335.1 and AS/NZS 60335.2.4:2010 A1-3.

9. CONTROL OR CONDITIONING DEVICE - an electrical device which –

- (a) is a household type;

- (b) is for automatically controlling or conditioning the electrical input to electrical apparatus via outlet facilities of the control or conditioning device.
- (c) is self contained and portable; and
- (d) connects to supply by means of a flexible cord and plug, appliance inlet or pins for engagement with a socket-outlet.

Class specification:

AS/NZS 3100 and AS/NZS 3105:2014.

10. COOKING APPLIANCE - PORTABLE TYPE - an electrical appliance which -

- (a) is a household type;
- (b) is for cooking or warming food by electrical energy; and
- (c) is portable.

Class specification:

Griller, roaster, or oven (including breadmaker)-

AS/NZS 60335.1 and AS/NZS 60335.2.9: 2009+A1 (until 28 November 2017) or AS/NZS 60335.2.9:2014+A1.

Warming plate and similar-

AS/NZS 60335.1 and AS/NZS 60335.2.12:2004+A1.

Frying pan, deep fryer or wok-

AS/NZS 60335.1 and AS/NZS 60335.2.13:2010.

Outdoor barbecue-

AS/NZS 60335.1 and AS/NZS 60335.2.78:2005+A1-2.

11. CORD EXTENSION SOCKET - an electrical device which –

- (a) is for attachment to a flexible cord;
- (b) has a maximum rating of 20 A at low voltage; and
- (c) has contacts whereby a detachable connection may be made with the corresponding pins of a plug or an inlet;

but does not include -

- (d) a connector or appliance connector designated in AS/NZS 3123; or
- (e) a socket outlet designated in AS/NZS 3131.
- (f) an installation coupler designated in AS/NZS 61535.1.

Class specification:

AS/NZS 3100 and AS/NZS 3120:2011+A1.

12. CORD-LINE SWITCH - an electrical device which -

- (a) is for attachment in a flexible cord;
- (b) manually opens and closes an electrical circuit; and
- (c) has a rating not exceeding 16 A at low voltage;

but does not include -

- (d) bell push and pendant switches.

Class specification:

AS/NZS 3100 and AS/NZS 3127:2005.

13. DECORATIVE LIGHTING OUTFIT - an electrical appliance which –

- (a) is for decorative, display or illumination purposes;
- (b) is portable;
- (c) consists of -
 - (i) electric light sources or lampholders interconnected by flexible cord of less than 2.5 mm sq cross-sectional area; or
 - (ii) electric light sources within a flexible enclosure; and
- (d) may be integral with a frame or similar support; and includes -
- (e) any integral power supply or control device.

Class specification:

AS/NZS 60598.1 and AS/NZS 60598.2.20:2002.

14. DISHWASHING MACHINE - an electrical appliance which –

- (a) is a household type; and
- (b) is for washing of eating or cooking utensils.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.5:2002+A1-3 (until 27 June 2017) or AS/NZS 60335.2.5:2014+A1.

15. DOUBLE CAPPED LIGHT EMITTING SEMICONDUCTOR LAMP

An electrical appliance that—

- (a) is a tubular light emitting semiconductor light source;
- (b) is a double capped lamp; and
- (c) has integral, built-in or independent control gear

but does not include—

- (d) a self-ballasted light emitting semiconductor light source within the scope of AS/NZS IEC 62560.

Class specification:

AS/NZS 60598.2.1 2014 + A1 Appendix A.

16. EDISON SCREW LAMPHOLDER - an electrical device which –

- (a) accommodates a lamp with an Edison screw cap of 14 mm or 27 mm nominal outside diameter;

but does not include –

- (b) a lampholder which by design is restricted to specific appliances; or
- (c) a lampholder which is for incorporation in industrial equipment only.

Class specification:

AS/NZS 3100 and AS/NZS 3140:2014+A1 (until 30 December 2016) or AS/NZS 60238:2015+A1.

17. FAN - an electrical appliance which –

- (a) is a household type;
- (b) has a primary function of moving air in its vicinity for comfort or extraction purposes; and
- (c) is self-contained;

and includes -

- (d) any associated ancillary equipment.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.80:2004+A1 (until 30/06/2019) or AS/NZS 60335.1 and AS/NZS 60335.2.80 : 2016.

18. FENCE ENERGISER – an electrical appliance which regulates and controls the supply of electrical energy to an electric fence.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.76:2003+A1-4.

19. FLEXIBLE HEATING PAD - an electrical appliance which -

- (a) is for application of heat to parts of the human body;
- (b) is in the form of a flexible pad; and
- (c) has a projected area not exceeding 0.6 square metres.

But does not include –

- (d) appliances specifically intended for use under direct medical supervision.

Class specification:

Foot warmer and foot mat-

AS/NZS 60335.1 and AS/NZS 60335.2.81:2012 (until 30 November 2018) or AS/NZS 60335.2.81:2015.

Other-

AS/NZS 60335.1 and AS/NZS 60355.2.17:2012+A1.

20. FLOOR POLISHER/SCRUBBER – an electrical appliance which –

- (a) is a household type; and
- (b) is used to polish or scrub floors.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.10:2006+A1.

21. FLUORESCENT LAMP BALLAST - an electrical device which –

- (a) is for controlling the magnitude of current flowing through the discharge path of a fluorescent lamp;
- (b) is of the independent or built-in type intended for use with luminaires (portable or fixed); or
- (c) is of the integral type, rated at 60 watts or less, such that it forms a non-replaceable part of a fluorescent lamp/ballast combination; or
- (d) is of the adaptor type such that it allows the insertion of a fluorescent lamp into the ballast by the user;

and includes -

- (e) any capacitor incorporated in or supplied with the ballast;

but does not include -

- (f) a ballast which is incorporated in luminaires certified for compliance with the requirements for electrical equipment with increased safety type protection (Ex e) for use in hazardous locations.

Class specification:

Integral (self-ballasted lamp) magnetic and electronic types-
AS/NZS 60968:2001.

Other magnetic type-
AS/NZS 61347.1 and AS/NZS 61347.2.8:2003.

Other electronic type
AS/NZS 61347.1 and AS/NZS 61347.2.3:2004.

Fluorescent lamp adaptors (T8:T5)
AS/NZS 61347.1 and AS/NZS 61347.2.3:2004 and the relevant requirements of AS/NZS 60598.2.1 :
2016 A1.

22. FLUORESCENT LAMP STARTER - an electrical device which –

- (a) is for starting preheat type fluorescent lamps;
- (b) is a glow-start type; and
- (c) has an enclosure of insulating material.

Class specification:

AS/NZS 60155:2000 (Section 1)+A1-2.

23. HAIR CARE APPLIANCE - an electrical appliance which –

- (a) is a household type or a commercial hand-held type; and
- (b) is for drying, styling or the caring of human hair.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.23:2012+A1.

For Hair Straighteners only –

- (i) the approval period is limited to two years.
- (ii) the test report must indicate testing carried out no more than twelve months prior to the application date; and
- (iii) the test report must clearly identify the model number and brand name, OR the manufacturer must provide a clear and concise statement that clarifies any deviation from the report details.

24. HEDGE CLIPPER – an electrical appliance which –

- (a) is for trimming hedges; and
- (b) is hand held.

Class specification:

AS/NZS 60745.1 and AS/NZS 60745.2.15:2010.

25. IMMERSION HEATER - an electrical appliance which –

- (a) is a household type;
- (b) is for heating liquid in which it may be immersed; and
- (c) is self-contained;

and includes -

- (d) aquarium type immersion heaters.

Class specification:

Aquarium type-

AS/NZS 60335.1 and AS/NZS 60335.2.55:2011.

Portable (other than aquarium) type-

AS/NZS 60335.1 and AS/NZS 60335.2.74:2005+A1-2.

Fixed type-

AS/NZS 60335.1 and AS/NZS 60335.2.73:2005+A1-2.

26. INSECT ELECTROCUTOR - an electrical appliance which –

- (a) is a household type; and
- (b) kills insects by the application of electrical energy.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.59:2005+A1-3.

27. INSPECTION HANDLAMP - an electrical appliance which –

- (a) is for inspection purposes using illumination;
- (b) contains an electric light source and
- (c) is hand held;

but does not include -

- (d) handlamps with a magnification facility.

Class specification:

AS/NZS 60598.1 and AS/NZS 60598.2.8:2015.

28. IRON - an electrical appliance which –

- (a) is a household type;
- (b) is for smoothing or pressing fabric by the application of heat or steam; and
- (c) is hand held except for any separate steam generator;

and includes -

- (d) any associated equipment.

Class specification:

Fabric steamer -

AS/NZS 60335.1 and AS/NZS 60335.2.85:2005+A1.

Other -

AS/NZS 60335.1 and AS/NZS 60335.2.3:2012+A1.

29. KITCHEN MACHINE - an electrical appliance which –

- (a) is a household type;
- (b) is for the preparation of food by mechanical means; or
- (c) is for opening cans; or
- (d) is for sharpening of knives.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.14:2007+A1 (until 25 October 2016) or
AS/NZS 60335.2.14: 2013.

30. LAWN CARE APPLIANCE - an electrical appliance which –

- (a) is a household type; and
- (b) is for cutting grass or lawn.

Class specification:

Mower (except for robotic lawn mower) -

AS/NZS 60335.1 and AS/NZS 60335.2.77:2002+A1.

Robotic lawn mower-

AS/NZS 60335.1 and AS/NZS 60335.2.107:2013+A1.

Trimmer (with non-metallic filament line or cutter/s)-

AS/NZS 60335.1 and 60335.2.91:2008+A1.

Trimmer (other)-

AS/NZS 60335.1 and AS/NZS 60335.2.91:2008+A1.

Grass Shears:

AS/NZS 60335.1 and AS/NZS 60335.2.94:2008.

31. LIQUID HEATING APPLIANCE – an electrical appliance which –

- (a) is a household type;
- (b) is portable;
- (c) has a capacity not exceeding 10L; and
- (d) heats liquid for:
 - (i) humidifying room air; or
 - (ii) use in, or as, a hot beverage; or
 - (iii) cooking.

Class specification:

Humidifier-

AS/NZS 60335.1 and AS/NZS 60335.2.98:2005+A1-2.

Other-

AS/NZS 60335.1 and AS/NZS 60335.2.15:2013.

32. LUMINAIRE - PORTABLE TYPE - an electrical appliance which -

- (a) is a household type;
- (b) provides illumination or for decorative purposes, produces light;
- (c) is fitted with a supply flexible cord, an appliance inlet socket or a power supply unit with integral pins for insertion into a socket outlet;
- (d) is for standing on a table or floor, or is fitted with a clamp or similar for attachment to vertical or horizontal surfaces;
- (e) is for use with tungsten filament, tubular fluorescent or other discharge lamps or Light Emitting Diode “LED” types; and
- (f) is constructed to represent a model, person or animal and by its design and materials is likely to be treated by a child as a toy; or
- (g) has metal parts which are required to be earthed or double insulated from live parts (excluding live parts of an all insulated lampholder).

Class specification:

Child appealing type (refer to clause (f)-

AS/NZS 60598.1 and AS/NZS 60598.2.10:2015.

Type fitted with a built-in transformer or convertor-

AS/NZS 60598.1 and AS/NZS 60598.2.6:1998.

Type for Garden Use –

AS/NZS 60598.1 and AS/NZS 60598.2.7:2005.

Other-

AS/NZS 60598.1 and AS/NZS 60598.2.4:2005+A1.

33. MASSAGE APPLIANCE - an electrical appliance which -

- (a) is a household type;
- (b) is for massaging the human body;
- (c) is portable; and
- (d) is self-contained.

Class specification:
AS/NZS 60335.1 or AS/NZS 60335.2.32:2014.

34. MICROWAVE OVEN - an electrical appliance which –

- (a) is a household type; and
- (b) applies heat to food, liquid or other substances in a chamber by means of high frequency electromagnetic radiation.

Class specification:
AS/NZS 60335.1 and AS/NZS 60335.2.25:2011+A1.

35. MINIATURE OVERCURRENT CIRCUIT-BREAKER - an electrical device which -

- (a) is an enclosed air-break switch;
- (b) opens a low voltage circuit automatically under pre-determined conditions of overcurrent;
- (c) has a nominal rating not exceeding 125 A; and has -
 - (i) a current breaking capacity up to but not including 10 kA; and/or
 - (ii) a projected panel mounting area not exceeding 4000 square millimetres per pole;

but does not include -

- (d) miniature overcurrent circuit-breakers as defined but which:
 - i) are intended and marked as being only for use in industrial application; or
 - ii) are intended only for use within and for protection of electrical equipment as distinct from circuit wiring and are appropriately marked.

Class specification:
AS/NZS 60898.1:2004 and AS/NZS 60898.2:2004.
(or AS 60947.2:2015 for DC circuit breakers outside the scope of AS/NZS 60898.2) or AS/NZS 3111:2009+A1-2.

36. OUTLET DEVICE - an electrical device which –

- (a) is a household type;
- (b) as its primary function, extends supply from a socket-outlet;
- (c) is portable;
- (d) incorporates facilities for the insertion of a plug or plugs; and
- (e) has a rating not exceeding 20 A;

but does not include -

- (f) a cord extension set.

Class specification:
Integral pin type (including travel adaptor) -
AS/NZS 3100 and AS/NZS 3122:2005 (until 27 August 2017) or AS/NZS 3122:2015.

AS/NZS 3122:2005 is modified to preclude types that can be rewired by the user.

AS/NZS 3122:2005 is modified to include the requirements of AS/NZS 3122:2015 Appendix A3.2.2 – ‘Abnormal insertion of Travel Adaptors’.

Other -
AS/NZS 3100 and AS/NZS 3105:2014.

37. PLUG - an electrical device which -

- (a) makes a detachable connection between the contacts of a socket-outlet and the conductors of a flexible cord;
- (b) has two, three or four pins for insertion into a socket-outlet; and
- (c) has a rating not exceeding 20A.;

but does not include -

- (d) a plug which is within the scope of AS/NZS 3123:2005 and is intended for industrial use; or
- (e) a plug which is within the scope of AS/NZS 3131:2001 or AS/NZS 61535:2011.

Class specification:

AS/NZS 3100 and AS/NZS 3112:2011+A1-3.

NOTE: It is intended to preclude plugs of a non-Australian type.

38. POWER SUPPLY OR CHARGER - an electrical appliance which -

- (a) provides an output not exceeding 50 volts a.c. or 120 volts ripple free d.c.; and
- (b) is a type to provide supply to separate luminaires; or
- (c) is a household type for either charging batteries or to provide a supply to separate equipment.

but does not include:

- (d) Information Technology and Audio Video equipment that can use the output to also transmit data that is not associated with a power supply or charger function.

Class specification:

Power supply for general use-

AS/NZS 61558.1 and AS/NZS 61558.2.6:2009+A1 or AS/NZS 61558.2.16: 2010 A1-3 (for switched mode types).

Power supply (electronic or transformer types) designated for use with specific electronic equipment-

AS/NZS 60065:2012+A1; or

AS/NZS 60950.1:2011+A1 (until 1 September 2017) or AS/NZS 60950.1:2015; or

AS/NZS 61558.1 and AS/NZS 61558.2.16: 2010+A1-3 (for switched mode types).

Note: Consideration is being given to the alternative adoption of IEC:62368 : 2015.

Power supply for toys-

AS/NZS 61558.1:2008 and 61558.2.7:2008+A1; or

AS/NZS 61558.2.16: 2010+A1-3 (for switched mode types).

Power supply for bells or chimes-

AS/NZS 61558.1 and AS/NZS 61558.2.8:2011+A1; or

AS/NZS 61558.2.16: 2010+A1-3 (for switched mode types).

Power supply for lighting purposes-

Electronic Type:

LED modules: AS/NZS 61347.1 and AS/NZS IEC 61347.2.13:2013

Other: AS/NZS 61347.1 and AS/NZS 61347.2.2:2007.

Ferromagnetic Type: AS/NZS 61558.2.6+A1: 2009.

Power supply for Handlamps-

AS/NZS 61558.1 and AS/NZS 61558.2.9:2011+A1; or
AS/NZS 61558.2.16: 2010+A1-3 (for switched mode types).

Power Supply for fence energiser-

AS/NZS 61558.1 and AS/NZS 61558.2.6:2009+A1 together with AS/NZS 60335.2.76:2003+A1-4; or
AS/NZS 61558.2.16:2010 A1-3 together with AS/NZS 60335.2.76:2003+A1-4 (for switched mode types).

Battery charger-

AS/NZS 60335.1 and AS/NZS 60335.2.29:2004+A1-2.

39. PROJECTOR - an electrical appliance which –

- (a) is a household type; and
- (b) is for projecting an image from a photographic slide or moving film.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.56:2006+A1-2.

40. RANGE - an electrical appliance which -

- (a) is a household type;
- (b) is for cooking food using heat produced by electrical energy; and
- (c) is stationary.

Class specification:

Fixed outdoor barbecue-

AS/NZS 60335.1 and AS/NZS 60335.2.78:2005+A1-2.

Other-

AS/NZS 60335.1 and AS/NZS 60335.2.6:2008+A1-4 until 28 November 2017) or AS/NZS 60335.2.6:2014+A1.

41. RANGE HOOD - an electrical appliance which –

- (a) is a household type;
- (b) collects and/or filters air; and
- (c) is for installation above, or adjacent to, a cooking appliance.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.31:2013+A1.

42. RAZOR/HAIR CLIPPER - an electrical appliance which –

- (a) is a household type; and
- (b) shaves, cuts or trims human hair.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.8: 2013.

43. REFRIGERATOR/FREEZER - an electrical appliance which -

- (a) is a household type; and
- (b) cools and stores food.

but does not include –

- (c) wine coolers

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.1 and AS/NZS 60335.2.24:2010+A1.

44. RESIDUAL CURRENT DEVICE - an electrical device which –

- (a) isolates or initiates a tripping signal to isolate a low-voltage supply to protected circuits, sockets-outlets or equipment in the event of a current flow to earth which exceeds a pre-determined level;
- (b) may be fixed or portable
- (c) has a rated residual current not exceeding 300 mA for devices intended for connection to fixed wiring or 30 mA for other devices; and
- (d) has a rated load current not exceeding 125 A for devices intended for connection to fixed wiring or 20 A for other devices;

but does not include -

- (e) a device intended to be used with a particular circuit-breaker other than a miniature overcurrent circuit-breaker; or
- (f) a device intended to protect an electricity supply authority distribution system; or
- (g) a device covered by AS 2081 and intended for mines use.

Class specification:

Without integral overcurrent protection -

AS/NZS 61008.1:2015 or AS/NZS 3190:2011.

With integral overcurrent protection -

AS/NZS 61009.1:2015 or;

AS/NZS 3190:2016 and AS/NZS 3111:2009+A1-2.

Type 'B' and 'F' devices: IEC 62423.

Type SPE – PRCD's: IEC 62335.

For portable types –

- (a) AS/NZS 3190:2016; or
- (b) AS/NZS 3190:2016 together with AS/NZS 3012:2010+A1 (Type PSOA); or

- (c) IEC 62335 (Type SPE); or
- (d) IEC 61540. In addition they shall comply with the PRCD and PSOA requirements of AS/NZS 3190.

45. ROOM HEATER - an electrical appliance which –

- (a) is a household type; and
- (b) is for heating, by electrical energy, the atmosphere for comfort purposes;

and includes –

- (c) an appliance that accommodates one or more heatlamps;

but does not include -

- (d) an air-conditioning appliance;
- (e) a heating system that is intended to heat the atmosphere of a room primarily by raising the temperature of any floor, wall, or ceiling area; or
- (f) an under-carpet heating system.

Class specification:

Thermal storage type-
AS/NZS 60335.1 and AS/NZS 60335.2.61:2005+A1-2.

Other-
AS/NZS 60335.1 and AS/NZS 60335.2.30:2009+A1-2 (until 30 June 2018) or AS/NZS 60335.2.30:2015.

46. SEWING MACHINE – an electrical appliance which –

- (a) is a household type; and
- (b) is for stitching fabric or other material.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.28:2006+A1.

47. SOCKET-OUTLET - an electrical device which –

- (a) is for fixing at a point at which fixed wiring terminates;
- (b) provides a detachable connection with the pins of a plug;
- (c) has two, three or four contacts; and
- (d) has a rating not exceeding 20A.;

but does not include -

- (e) an outlet within the scope of AS/NZS 3123 or AS/NZS 3131 or AS/NZS 61535.

Class specification:

AS/NZS 3100 and AS/NZS 3112:2011+A1-3
AS/NZS 60884.1:2013 (including annex ZZ).

Socket Outlets shall not allow projected plug portions for any aperture set to be overlapped.

48. SOLDERING IRON - an electrical appliance which –

- (a) is for the application or removal of solder; and
- (b) is hand held;
and includes -
- (c) any integral or associated power supply or controller;
but does not include -
- (d) a soldering iron promoted exclusively to industry.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.45: 2012.

49 . SUPPLY FLEXIBLE CORD - an electrical cord which –

- (a) is unshielded and flexible;
- (b) is designed for use at low voltage;
- (c) consists of two or three elastomer or PVC insulated cores of multistrand construction;
- (d) has a cross-sectional area of each conductor not exceeding 2.5 square millimetres; and
- (e) has for other than tinsel cords, individual wire strandings not exceeding -
 - (i) 0.21 mm for conductor sizes up to 1 square millimetre; or
 - (ii) 0.26 mm for conductor sizes exceeding 1 square millimetre;

but does not include -

- (f) a flexible cord directly connected to equipment or approved non-rewirable accessories which is marked in accordance with the CENELEC HAR marking scheme for flexible cords.

Class specification:

General flexible cord-

AS/NZS 3191:2008; or

AS/NZS 60227.5:2003+A1 (PVC); or

AS/NZS 60245.4:2003+A1 (Rubber).

Halogen-free thermoplastic insulation cord-

EN 50525-3-11:2011.

Halogen-free crosslinked insulation cord-

EN 50525-3-21:2011.

50. SWIMMING POOL OR SPA EQUIPMENT - an electrical appliance or device –

- (a) that is a transportable spa pool or transportable spa-bath, or
- (b) that is for circulating air or water in a conventional bath; or
- (c) that is for use in the operation or cleaning of a swimming pool, non-transportable spa pool or non-transportable spa-bath.

But does not include –

- (d) an appliance or device exclusively promoted for commercial use; or
- (e) a heat pump

Class specification:

Pump-

AS/NZS 60335.1 and AS/NZS 60335.2.41:2004+A1 (until 25 October 2016) or AS/NZS 60335.2.41:2013.

Spa pool, Spa bath or an appliance intended to circulate air or water in a conventional bath-
AS/NZS 60335.1 and AS/NZS 60335.2.60:2006+A1.

UV radiation water treatment appliances-
AS/NZS 60335.2.109:2011+A1.

Other-

AS/NZS 3100 and AS/NZS 3136:2001+A1-2.

51. TELEVISION RECEIVER - an electrical appliance which –

- (a) is for household use;
- (b) is for the display of public or subscription television broadcasts; and
- (c) incorporates a single cathode ray picture tube.

Class specification:

AS/NZS 60065:2012+A1.

52. THERAPEUTIC LAMP - an electrical appliance which –

- (a) is a household type;
- (b) produces ultraviolet or infra-red radiation for personal, therapeutic or cosmetic purposes; and
- (c) is portable.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.27:2010+A1-2 (until 30 June 3 2018); or AS/NZS 60335.2.27 : 2016.

53. TOOL - PORTABLE TYPE - an electrical appliance which –

- (a) is for machining, drilling, sawing, or surface preparation; and
- (b) may be entirely supported by hand during operation;

but does not include -

- (c) a tool, portable type, promoted exclusively to industry.

Class specification:

Drill-

AS/NZS 60745.1 and AS/NZS 60745.2.1:2009.

Sander or polisher (other than disk types)-

AS/NZS 60745.1 and AS/NZS 60745.2.4:2009 (until 26 June 2018) or AS/NZS 62841.2.4:2015.

Circular saw-

AS/NZS 60745.1 and AS/NZS 60745.2.5:2011 (until 26 June 2018) or AS/NZS 62841.2.5:2015.

Jig or sabre saw-
AS/NZS 60745.1 and AS/NZS 60745.2.11:2009.

Planer-
AS/NZS 60745.1 and S/NZS 60745.2.14:2011 or
AS/NZS 62841 and AS/NZS 62841.2.14:2016.

Router-
AS/NZS 60745.1 and AS/NZS 60745.2.17:2011.

Grinder, polisher and disk type sander-
AS/NZS 60745.1 and AS/NZS 60745.2.3:2011+A1.

Chain saw-
AS/NZS 60745.1 and AS/NZS 60745.2.13:2010+A1.

Jointer-
AS/NZS 60745.1 and AS/NZS 60745.2.19:2011.

Other: (in the 60745 Series)
AS/NZS 60745.1 and the appropriate AS/NZS 60745 Part 2 when published;

Other: (in the 62841 Series)
AS/NZS 62841.1 and the appropriate AS/NZS 62841 when published;

Other (where an AS.NZS 60745 Part 2 or AS/NZS 62841 is not available)
AS/NZS 3100 and AS/NZS 3160:2009 A1.

54. VACUUM CLEANER - an electrical appliance which –

- (a) is a household type;
- (b) is portable; and
- (c) removes dust, dirt or moisture and the like from floor coverings by suction; or
- (d) removes garden refuse from lawns or paths and the like by suction.

Class specification:
Hand held garden type-
AS/NZS 60335.1 and AS/NZS 60335.2.100:2003.

Other-
AS/NZS 60335.1 and AS/NZS 60335.2.2:2010+A1-3.

55. WALL SWITCH - an electrical device which –

- (a) is an air-break switch;
- (b) is for connection to the wiring of an electrical installation;
- (c) is primarily for mounting on a vertical surface;
- (d) is manually opened and manually closed; and
- (e) has a rating not exceeding 20 A.

Class specification:
AS/NZS 3100 and AS/NZS 3133:2013+A1-2 or
AS/NZS 60669.1:2013 and AS/NZS 60669.2.1:2013.

56. WASHING MACHINE - an electrical appliance which –

- (a) is a household type; and
- (b) is used for washing clothes.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.7:2012+A1.

57. WATER BED HEATER - an electrical appliance which –

- (a) is for installation under a water bed envelope; and
- (b) heats water contained in that envelope;

and includes -

- (c) any associated control device.

Class specification:

AS/NZS 60335.1 and AS/NZS 60335.2.66:2012.

58. WATER HEATER - an electrical appliance which –

- (a) is for heating and storage of water for bathing, washing or similar purposes;
- (b) incorporates a heating element;
- (c) is unvented; and
- (d) has a storage capacity not less than 4.5 L nor more than 680 L.

or

- (e) is for heating water
- (f) is of the instantaneous type; and
- (g) incorporates live parts in contact with water.

Class specification:

Pressure storage -

AS/NZS 60335.1 and AS/NZS 60335.2.21:2013.

Instantaneous -

AS/NZS 60335.1 and AS/NZS 60335.2.35:2013.
