Subject: 10. Shade sails and shade systems installation licence removal

To whom it may concern,

The consideration of removing the licensing for Shade sails and shade systems installation would be a failure in its duty of care.

The majority of the shade shelters in our schools and council parks are installed in this category , removing the licensing puts our children and parents at risk

By removing this licence category the government will fail its duty of care to our children if a catastrophic failure occurs in one of our schools or council parks

This Licence requires some of the following works to be conducted
deep excavation
Structural steel erection
Structural Concreting
reading plans and details

These structures cover play equipment, basketball courts, shopping centre car parks.

If this licence is removed it poses a potential risk to the community

Kind regards
Stephen Carruthers
