Building Stronger Foundations Consultation.

I have had trouble with your online submission form.

You may publish my submission on your website - Name "Anonymous"

purchased an "Adaptable" apartment at the for a participant from the NDIS scheme that requires "Specialist Disability Accommodation". Before the Participant can move in the NDIA require confirmation that the apartment meets the standards before registering the property. The NDIA certifier failed the apartment because it did not met the "Adaptable Standards". The developer was notified and they attended to the items that required attention and it has since been certified.

Why did the Developers Certifier sign off on this? Peoples lives are at stake here!  
This makes me question this certifiers previous works, what else has he signed of on that does not meet the required standards.

I look forward to your response.

Yours sincerely
