

Dear sir/madam,

We have read the recent REINSW public submission into improving the property services industry requirements for training and development. The POANSW is supportive of the principal of better educated property professionals. The POANSW is of the view that the submission shows significant merit & its recommendations are generally consistent with the interests of property owners in NSW.

That said the POANSW would oppose any introduction of requirements for training of private property investors that are not "professional practitioners"

Regards

John Gilmovich

President

Property Owners Association of NSW
